

COOPERATION WITH UNIDO MAKING A SOLAR ASSISTED DRYING SYSTEM FOR FISHES(2012)

Sokpheap, a CKN teacher, experimenting her control electronic system in a small drying model

Building at CKN campus the solar dryer to be installed at Krakor (in Pursat province)

The traditional way of drying fishes in Cambodia. Depending and relying on the sunny time

CKN starts installing his solar dryer in Krakor, near the traditional drying area.

The Solar dryer at krakor starts working, producing 30 Kg/chamber of dried clean fishes every 25 hours.
